

MARIYA EGGENSPERGER

ABOUT ME

Hi! I'm a Computer Science student with a specialization in iOS Development. In addition to pursuing my B.S. in Computer Science, I also attended and graduated from the Flatiron School iOS Development immersive where a rigorous environment in iOS provided me with experience in Objective-C, Swift, User Interface Design and agile methodologies.

PROJECTS

FanBase

[Github Repo](#)

[App Store](#)

A hybrid mobile app for iPhone/Android enabling users to build and experience quests with real-time multiplayer location and status updates. Built with Ionic, Angular, Socket.io, and a Node.js/MongoDB web server.

MonsterMake

[Github Repo](#)

A full featured, e-commerce application with multitenancy, Stripe payment integration, reviews, and social media sharing. Full customer service and order management capabilities. Built with AngularJS, Node.js, Express, and MongoDB.

Machine Shop Smart Scheduler

[Internal solution for Permaswage](#)

Automated ERP scheduling application, providing 2-way real time schedule and priority updates between factory floor and auxiliary support functions, synchronizes 120 personnel supporting 80 production CNC work centers across 7 departments. Built with C#, .NET, SQL Server, JD Edwards ERP.

PROFESSIONAL EXPERIENCE

**Cal Poly
Pomona**
2013-2015

Student Coordinator

Promoted physics student and faculty partnerships through recruiting of physics students as learning assistants. Coordinated pedagogical events and organized admissions acceptances and applications.

Civic Projects
2013-2015

Planning Intern

Assisted in the evaluation of city planning policies in an effort to reinvision municipal priorities for allocation of urban, physical and social economic resources. Experience working in a startup environment.

Klean Home
2006-2014

Business Owner

For eight years, I operated my own, residential cleaning business and maintained business ledgers. Developed marketing strategies to generate profit and establish clientele.
